

SensJus quarterly bulletin - first quarter of 2023 - 2 February 2023

Dear [SensJus](#) project friends,

As this is the first bulletin of 2023, let us wish you a happy new year!

We take this occasion to ask you to please indicate to us if anything has changed in your preferences and you would like to be removed from this list.

As the SensJus project is getting closer to an end (August 2023), we are putting efforts in offering to policy-makers accessible briefs. We are particularly happy to share two of them just out as JRC science for policy briefs:

- Berti Suman, A. (2023) *Civic monitoring for environmental enforcement. Exploring the potential and use of evidence gathered by lay people*, European Commission, JRC132206 <https://publications.jrc.ec.europa.eu/repository/handle/JRC132206>
- Beck, P., Berti Suman, A., Bouraoui, F., Devos, W. and Martini, G. (2022) *An exploration of science in courts - How science supports the enforcement of EU law*, European Commission, JRC132401. <https://publications.jrc.ec.europa.eu/repository/handle/JRC132401>

The first mainly builds on the last years of SensJus research whereas the second is the results of an enriching exchange started in occasion of the JRC Science Summit, with colleagues from other JRC teams and from DG ENV and DG JUST.

We are also happy to share a scientific article, resulting of a nice collaboration with two co-authors:

- Berti Suman, A., Heyen, N.B. and Micheli, M. (2023) *Reimagining health services provision for neglected groups: The “personalization from below” phenomenon*. *Frontiers in Sociology*. 8:1052215. doi: 10.3389/fsoc.2023.1052215. Find it online [here](#)

Moreover, we would like to invite you to an online event that will take place **February 9 from 10 am CET**. We will give a lecture titled “*Citizen Science and Civic Monitoring Supporting Law Enforcement: A New Frontier?*” for the 2nd International Society for Digital Earth International Lectures series, with the theme of ‘The Digital Earth(s) of Citizens’. Find connection and more details [here](#). You will hear three perspectives on how citizens use Digital Earth technologies to monitor the environment.

Lastly, we recently embarked in and just concluded a great intensive course by the Vrije Universiteit Amsterdam, on “*Research-Creation: Merging the Critical and the Creative*” focused on how artistic practice can become research, and on the act of creation as a form of knowledge in and of itself. Find more [here](#) and if you are interested, check the [next course](#).

We hope that this information was useful and inspiring for you!

Best regards, also on behalf of Sven,

Anna
